SUMMARY

I am deeply passionate about cybersecurity, driven by a commitment to safeguard digital environments against evolving threats. With a strong foundation in network security, threat analysis, and ethical hacking, I am dedicated to staying ahead in the ever-changing landscape of cyber threats. My goal is to contribute to a secure digital world through innovative solutions and proactive defense strategies.

PROFESSIONAL EXPERIENCE

System Security Engineer | 2025-*Present*

Shield Tech Hub

- Collaborative Security Testing: Led red/blue team exercises, validated SIEM/SOAR detections, and translated attack findings into defensive controls.
- Defensive Improvement: improved incident response playbooks, and managed SOC deployments.
- Perform vulnerability assessments, penetration testing, and risk analysis on infrastructure and applications.
- Tool Development: Built collaborative security automation tools and maintained a purple team testing toolkit.

Junior System Security Engineer | 2024-2025

Shield Tech Hub

- Blue Teaming: Develop and implement security measures to protect systems and networks.
- Penetration Testing: Assist in vulnerability assessments and penetration testing to identify and remediate security weaknesses.
- DevSecOps: Support the integration of security into the DevOps process.

EDUCATION

University Of Kigali

Bachelor's Degree in Information Technology

St. Kizito Technical High School

High School Diploma in Computer Science

TECHNICAL SKILLS

- Ethical Hacking
- Reconnaissance OSINT
- Threat Intelligence
- Network Security
- SIEM Deployment & Configuration
- Digital Forensics

PROJECTS

Home Lab | SIEM Deployment & Attack Simulation

- Designed and deployed a distributed SIEM environment using Wazuh and Splunk for centralized log collection and detection
- Built realistic cyber ranges with vulnerable environments to simulate real-world attack scenarios
- Executed offensive security techniques and analyzed detection coverage from a blue team perspective
- Deployed and tested GOAD (Game of Active Directory) to simulate advanced Active Directory attacks
- Monitored attack scenarios in Wazuh, developing detection rules and improving alert accuracy
- Performed threat detection, log analysis, and correlation across multiple attack vectors

Self-Hosted SOC Triage | SOC Automation & AI-Assisted Incident Triage

- Built an AI-assisted SOC triage pipeline integrating Wazuh, n8n, AbuseIPDB, Ollama, and Discord to automate alert enrichment, analysis, and notification.
- Developed automated alert normalization, severity filtering, source-IP validation, threat-intelligence enrichment, and AI-generated triage summaries.
- Implemented security controls including authenticated webhooks, private-network service binding, environment-based secrets, input validation, and structured AI output validation.
- Designed the pipeline as a human-in-the-loop system that provides suggested responses without taking automated actions against infrastructure.
- Documented deployment, security hardening, testing, and operational limitations in an open-source GitHub repository.

VOLUNTEERING

Ambassador | 2026 - *Present*

Wazuh

- Represent Wazuh community in Rwanda, supporting users with deployment and troubleshooting
- Assist in debugging installation issues, configuration errors, and SIEM integration challenges
- Guide users on best practices for SIEM implementation and security monitoring
- Contribute technical knowledge through blog posts and community engagement
- Facilitate knowledge sharing and adoption of Wazuh within the local cybersecurity community

Lead Trainer | 2026

NCSA - Cyberhub

- Deliver instructor-led training on Cyber Defense and Incident Response, combining theory with hands-on practical exercises.
- Design and facilitate cybersecurity labs that simulate real-world attack detection and incident response scenarios.
- Develop training materials and mentor participants throughout practical exercises to strengthen their defensive cybersecurity skills.

CERTIFICATES

Practical Network Penetration Tester | 2026
TCM Security

Cyber Defense | 2024
TryHackMe

Lead Trainer | 2026
Cyberhub

Dante Pro Labs | 2025
HackTheBox

Certified Cybersecurity Educator Professional CCEP | 2026
Red Team Leaders

Practical Junior Penetration Tester | 2025
TCM Security
