SUMMARY

I am deeply passionate about cybersecurity, driven by a commitment to safeguard digital environments against evolving threats. With a strong foundation in network security, threat analysis, and ethical hacking, I am dedicated to staying ahead in the ever-changing landscape of cyber threats. My goal is to contribute to a secure digital world through innovative solutions and proactive defense strategies.

PROFESSIONAL EXPERIENCE

System Security Engineer | 2025-*Present*

Shield Tech Hub

- Collaborative Security Testing: Led red/blue team exercises, validated SIEM/SOAR detections, and translated attack findings into defensive controls.
- Defensive Improvement: improved incident response playbooks, and managed SOC deployments.
- Perform vulnerability assessments, penetration testing, and risk analysis on infrastructure and applications.
- Tool Development: Built collaborative security automation tools and maintained a purple team testing toolkit.

Junior System Security Engineer | 2024-2025

Shield Tech Hub

- Blue Teaming: Develop and implement security measures to protect systems and networks.
- Penetration Testing: Assist in vulnerability assessments and penetration testing to identify and remediate security weaknesses.
- DevSecOps: Support the integration of security into the DevOps process.

EDUCATION

University Of Kigali | 2023-2026

Bachelor's Degree in Information Technology

St. Kizito Technical High School

High School Diploma in Computer Science

TECHNICAL SKILLS

- Ethical Hacking
- Reconnaissance OSINT
- Threat Intelligence
- Network Security
- SIEM Deployment & Configuration
- Digital Forensics

PROJECTS

Home Lab | SIEM Deployment & Attack Simulation

- Designed and deployed a distributed SIEM environment using Wazuh and Splunk for centralized log collection and detection
- Built realistic cyber ranges with vulnerable environments to simulate real-world attack scenarios
- Executed offensive security techniques and analyzed detection coverage from a blue team perspective
- Deployed and tested GOAD (Game of Active Directory) to simulate advanced Active Directory attacks
- Monitored attack scenarios in Wazuh, developing detection rules and improving alert accuracy
- Performed threat detection, log analysis, and correlation across multiple attack vectors

---

VOLUNTEERING

Ambassador | 2026 - *Present*

Wazuh

- Represent Wazuh community in Rwanda, supporting users with deployment and troubleshooting
- Assist in debugging installation issues, configuration errors, and SIEM integration challenges
- Guide users on best practices for SIEM implementation and security monitoring
- Contribute technical knowledge through blog posts and community engagement
- Facilitate knowledge sharing and adoption of Wazuh within the local cybersecurity community

---

CERTIFICATES

Practical Junior Penetration Tester | 2025
TCM Security

Dante Pro Labs | 2025
HackTheBox

Cyber Defense | 2024
TryHackMe

Jr. Penetration Tester | 2024
TryHackMe
